

States produce standardized, easily-understandable "scorecards" that display performance information for WIOA training providers. This means that - for the first time - workers choosing among different training programs that recieve WIOA funding will be able to easily compare them on criteria that matter, like how much the program costs, the percentage of participants who complete the program and get jobs, and the average earnings of participants after they leave.

Training opportunities available to you

Success! We've found opportunities for training and education available to you in your area or online - or both. You can sort your results based on multiple criteria, including how close the training is to you, the rate of completion for those who enter, and the average salary of those who complete the training.
